

## THE ULTIMATE LAW OF THERMODYNAMICS

# Physical Matter and Entropy Were Made

Read this carefully, because it's the KEY to everything else in Science.

**The first law of thermodynamics is a version of the law of conservation of energy, adapted for thermodynamic systems. The law of conservation of energy states that the total energy of an isolated system is constant; energy can be transformed from one FORM to another, but can be neither created nor destroyed.**

[https://en.wikipedia.org/wiki/First\\_law\\_of\\_thermodynamics](https://en.wikipedia.org/wiki/First_law_of_thermodynamics)

Once I fully understood and accepted this simple axiom or Law, instantly everything became obvious and clear.

Energy or Syntropy can be neither created nor destroyed. However, Energy or Syntropy can be transformed from one FORM to another FORM. The FORM is never conserved. Physical matter and entropy are different FORMS of Energy, and the FORM is never conserved. Only the underlying Energy or Syntropy is being conserved. This is the Ultimate Law of Thermodynamics. Physical matter and entropy are never conserved. The FORM is never conserved.

Energy can be transformed.

Transformed by whom?

Who triggers this transformation? Who decides what FORM Energy will take? Someone Psyche has to make this decision, or nothing will happen, and physical matter will never be made.

Physical matter and entropy were made.

Made by whom?

Made from what?

**Scientific Observation: Anything that was obviously made obviously had a Maker who made it.**

**Scientific Observation: Physical matter, physical laws, physical constants, physical restrictions, space-time, locality, time, and entropy were obviously made.**

**Scientific Conclusion: Therefore, it is logical and rational to conclude that physical matter, physical laws, physical constants, physical restrictions, space-time, locality, time, and entropy obviously have a Maker who made them.**

The fatal flaw of the Materialists, Naturalists, Darwinists, Nihilists, and Atheists is that they teach and truly believe that only physical matter and entropy exist, which means that these people erroneously teach that physical matter and entropy are conserved. They are wrong. These people deliberately misinterpret the First Law of Thermodynamics, which states that Energy or Syntropy is conserved; and, these people get the rest of us to misunderstand and misinterpret the First Law of Thermodynamics by successfully convincing us that only physical matter and entropy exist and that consequently physical matter and entropy are being conserved.

One of my greatest scientific discoveries came when I first realized that physical matter and entropy are NOT conserved. The amount of physical matter, entropy, and space-time changes over time as God sees fit. Space, time, locality, entropy, spirit matter, and physical matter are different FORMS of energy. The FORM is never conserved. The FORM is constantly changing. It's the underlying Energy or Syntropy that's being conserved according to the First Law of Thermodynamics and  $E = mc^2$ . This scientific discovery is the answer to life, the universe, and everything. It explains everything.

Remember, physical matter, entropy, locality, and space-time are NOT conserved. Their amount is constantly changing. This is the Ultimate Law of Thermodynamics.

Physical matter, entropy, locality, and space-time are MADE, which means that they can be unmade or disassembled. With God's help, we humans make brand new physical matter in our particle accelerators. We humans also destroy physical matter or unmake physical matter in our atomic bombs. The physical matter and the associated entropy are NOT conserved. Their quantity is constantly changing. Remember, Energy is constantly changing FORM while at the same time being conserved. That's the way that science really works contrary to what the Materialists,

Naturalists, Darwinists, and Atheists claim to be true. The false is falsified by the truth; and, the truth is repeatedly experienced and observed.

Physical matter, physical laws, physical constants, physical restrictions, space-time, space, locality, time, and entropy were MADE which means that they have some kind of Maker. It also means that they can be disassembled or destroyed. They were made from Energy by God, which means that God can cause them to end or unmake them. They are different FORMS of Energy, and the FORM is never conserved. Only the underlying Energy or Syntropy is conserved. Physical matter and entropy are different FORMS of Energy, which means that physical matter and entropy are never conserved. The FORM is never conserved. This is the Ultimate Law of Thermodynamics.

My purpose in life is to identify everything that is false, eliminate it from science, and replace it with the truth. The materialistic and naturalistic idea that physical matter and entropy are conserved is a false idea and a falsified idea. I have eliminated it from my science and replaced it with the truth – namely, that it's the underlying Energy or Syntropy that's actually being conserved and not the physical matter or the entropy. All I want is the truth because everything else will mess you up in the end. It's the underlying Energy or Syntropy that ends up being eternal and everlasting, not the physical matter or the entropy. Physical matter and entropy are different FORMS of Energy, and the FORM is never conserved. Energy is Syntropy, and Energy is conserved.

Observation and experience have proven to us that the Ultimate Law of Thermodynamics is true. Physical matter, entropy, locality, time, space, and space-time are MADE, which means that they can also cease to exist anytime that God decides to put a stop to them.

According to the Theory of Relativity, when a photon or tachyon travels at the speed-of-light or faster, TIME STOPS. Entropy is a function of time. Entropy measures the passage of time. Entropy is an aging process. Locality is associated with space. Entropy is associated with time. Entropy is the passage of time. According to the Theory of Relativity, when a photon or tachyon travels at the speed-of-light or faster, ENTROPY STOPS or ENTROPY CEASES TO EXIST. From our entropic perspective, it took that photon 13.4 billion years to reach us. From the photon's syntropic perspective at the speed-of-light, it experienced NO passage of time; and, it arrived the very moment it launched. In other words, the photon and the tachyon didn't age. They didn't experience the passage of time. Entropy ceased to exist while they were traveling at the speed-of-light or faster. They literally quantum tunneled to their destination from their perspective. Remember, entropy is variable; and, entropy or the

passage of time ceases to exist at the speed-of-light or faster. In other words, entropy or the passage of time is not conserved at the speed-of-light or faster. Instead, entropy ceases to exist; and, everything becomes syntropic instead at velocities and frequencies faster than the speed-of-light.

Once again, the Materialists, Naturalists, Darwinists, Nihilists, and Atheists erroneously teach that nothing can travel faster than the speed-of-light because these people erroneously teach that only physical matter and entropy exist. These people are right in that physical matter or entropic matter cannot travel faster than the speed-of-light; however, these people are wrong in that spirit matter, quantum matter, syntropic matter, spiritual matter, tachyons, and psyche can and do travel faster than the speed-of-light; and, they can also quantum tunnel at will. At velocities equal to or greater than the speed-of-light, TIME STOPS; and, entropy or the passage of time ceases to exist. There is no entropy in the Syntropic Realm. Objects existing at frequencies faster than the speed-of-light experience no entropy because they experience NO passage of time. Entropy ceases to exist at velocities and frequencies faster than or equal to the speed-of-light, according to the Theory of Relativity.

God deliberately created physical matter and entropy (the passage of time) for us in order to slow things down for us so that we can live them, observe them, experience them, learn from them, experiment with them, and remember having done so. At velocities equal to or faster than the speed-of-light, there is NO entropy because there is NO passage of time. Time stops. Time or entropy ceases to exist. Time, entropy, and the passage of time were made by God, which means that they can also cease to exist or come to a stop. I have experienced and observed that TIME STOPS and entropy (the passage of time) temporarily ceases to exist, just before you are quantum tunneled to a different location on this earth. God has complete control over Quantum Mechanics including quantum tunneling. From the photon's perspective, it quantum tunnels or teleports to its destination because it experiences no passage of time or no entropy during its voyage. From my perspective, time stopped, and I experienced no passage of time when God quantum tunneled me and the car I was driving to safety. God can quantum tunnel physical matter anywhere in this universe instantaneously simply by stopping the passage of time or temporarily removing the entropy from that physical matter.

Remember, there's nothing sacred about physical matter and entropy. It's the Energy or the Syntropy that's being conserved. Energy can be organized into many different FORMS, including physical matter, spirit matter, space-time, physical laws, physical constants, space, time, locality, and entropy. Remember, it's the Energy or the Syntropy that's actually being conserved, not the physical matter or the entropy. This is the Ultimate Law of Thermodynamics. It explains everything that we humans have

experienced and observed. It corrects one of the fatal flaws in traditional science – namely, the erroneous belief that physical matter and entropy are being conserved. The Ultimate Law of Thermodynamics states that physical matter, entropy, locality, and space-time are NOT conserved. It's the underlying Energy or Syntropy that's being conserved, and NOT the physical matter or the entropy. Physical matter and entropy are just different FORMS of energy. Energy can be made to take on many different FORMS; and, the FORM is never conserved. It's the Energy or the Syntropy that's actually being conserved and NOT the FORM. The Ultimate Law of Thermodynamics is the answer to life, the universe, and everything. It explains everything.

This Ultimate Law of Thermodynamics is one of the greatest scientific discoveries of all time; and, it's only made possible by eliminating Materialism, Naturalism, Darwinism, Nihilism, Behaviorism, Determinism, Physical Reductionism, and Atheism from science. If you successfully eliminate everything that is false and everything that has been falsified, then only the truth will remain. This is Logic 101. You start by eliminating Materialism, Naturalism, Darwinism, Nihilism, and Atheism from science; and then you see where that gets you. It's interesting to study and observe what remains after you have successfully removed Materialism, Naturalism, Darwinism, Atheism, and their derivatives from science. The experienced and the observed remain. The truth remains.

Remember, the Biblical God Jesus Christ has been experienced and observed both in the flesh and during our near-death experiences AFTER He rose from the dead. Science is observation and experience.

The Materialists, Naturalists, Darwinists, Nihilists, and Atheists define “science” as Materialism, Naturalism, Darwinism, Nihilism, and Atheism. Based upon all these different scientific discoveries that I have made during the past couple of years, I have upgraded my science to Science 2.0; and, I have redefined Science as “observation and experience”. Observation and experience is a much better way to do science because the “non-existence of things” will never be experienced nor observed. It's impossible to experience and observe the “non-existence of something”, including the non-existence of God. As scientists, we should go with what has been experienced and observed, not the wishful thinking of the Naturalists, Darwinists, and Atheists.

Physical matter and entropy were obviously made from Energy. Physical matter had physical limitations, entropy, locality, sub-light velocities, mass, time, space, and physical restrictions programmed into it. Physical matter is Organized Energy, and it was organized by God. Since physical matter and entropy are never conserved, according to the Ultimate Law of Thermodynamics, God must of necessity exist in

order to have organized, created, or made the first particles of physical matter from Raw Energy.

**Scientific Observation: Anything that was obviously organized obviously had an Organizer who organized it.**

**Scientific Observation: Physical matter, physical laws, physical constants, space-time, physical restrictions, space, time, locality, and entropy were obviously organized and made from Energy. These things are different forms of Energy. Physical matter is Organized Energy.**

**Scientific Conclusion: Therefore, it is logical and rational to conclude that physical matter, physical laws, physical constants, space-time, physical restrictions, space, time, locality, and entropy obviously have an Organizer who organized them and made them from Energy.**

This truth has been experienced and observed. The false is falsified by the truth; and, the truth is repeatedly experienced and observed.

The Ultimate Law of Thermodynamics states that the FORM is never conserved, which means that the different forms of Energy such as physical matter and entropy are never conserved. Their quantity or amount is constantly changing. It's the underlying Energy or Syntropy that's always being conserved. It's the Energy, Syntropy, or Life Force that ends up being eternal and everlasting, not entropy or death. That is what has actually been experienced and observed.

Materialism, Naturalism, Darwinism, Nihilism, Behaviorism, Determinism, Physical Reductionism, and Atheism were designed to prevent us from discovering the Ultimate Law of Thermodynamics. Entropy is death; and, the Scientific Naturalists and Atheists erroneously teach that entropy or death is conserved. These people are wrong. Life after death has been experienced and observed.

The Psyche, Syntropy, Energy, or Life Force is always conserved; but, the entropic matter or physical matter is never conserved. Physical matter and entropy come and go as God sees fit. Physical matter and entropy are made, which means that they can be unmade or disassembled. In contrast, Psyche, Syntropy, Energy, or Life Force can be neither created nor destroyed. Psyche, Syntropy, Energy, and Life Force are eternal and everlasting, without a beginning of days or an end of years, because they are constantly being conserved. God's Psyche or God's Intelligence is being

conserved. Your psyche or your intelligence is being conserved. In contrast, physical matter and entropy are never conserved. This is the Ultimate Law of Thermodynamics.

The Ultimate Law of Thermodynamics is the answer to life, the universe, and everything. It has been experienced and observed.
